

## WHAT ELLSERVE BRINGS YOU

Ellserve is a comprehensive energy management solution.

### **Web-based Energy Information System**

This subscription based system enables you to process your invoices quickly and accurately.

An online report generator allows you to measure and monitor your energy usage, track budgets and understand your energy data.

### **Procurement Management**

Provided either under subscription or as a standalone option, the procurement service ensures that you buy your power at the best price and the lowest risk.

## HEDGESAFE

For larger consumers of electricity, HedgeSafe provides a suite of electricity hedging services. It covers everything from valuing a single hedge to the on-going management of a whole portfolio.

Together the HedgeSafe services interlock to provide total hedge management in a strategic risk framework.

  
SAVE > TIME > MONEY > ENERGY

## THE POWER BEHIND ELLSERVE

Ellserve was developed by Energy Link Ltd, a leading adviser on New Zealand's electricity and gas industries.

Since 1996, Energy Link has been a trusted provider of market advice to decision makers in Government and industry.

We understand the market and risks involved in trading in NZ's energy environment. Energy Link has built a respected market forecast and industry training business based on our reputation for reliable analysis and in-depth market knowledge.

Energy Link's CEO Greg Sise has over 20 years' consulting experience in the electricity industry in *Procurement, Risk Assessment, and Energy Management.*

*Energy Link is authorised by the Securities Commission to advise on electricity hedge contracts (since 1997).*

Benefit from our reputation for excellence in the energy industry – contact us today.

## EASY ENERGY MANAGEMENT

## CONTROL CONSUMPTION AND CUT COSTS

  
SAVE > TIME > MONEY > ENERGY

## EXPERT PROCUREMENT

### *Getting the Best Deal*

Ellserve provides a thorough approach to procurement in New Zealand's complex and dynamic energy market.

We will guide your procurement decisions from the market approach to post-deal review, including:

- » The best time to approach the market
- » The most suitable suppliers for your business
- » Constructing the best deal structure for you
- » Whether hedging is right for your business
- » Evaluating suppliers' additional services
- » Maximising the benefit of your in-house generation capacity

## WEB-BASED ENERGY INFORMATION SYSTEM

### *Immediate Benefits*

- » Removes the need to purchase, install or maintain your own energy management software
- » Eliminates the expense of costly data capture
- » Effortlessly illustrates your energy position by identifying energy and cost-saving opportunities

### *Simple Bill Processing*

- » Sources energy invoices electronically, directly from your retailer
- » Thoroughly checks invoices to identify errors
- » Resolves billing issues with the supplier on your behalf
- » Authorises correct invoices for payment
- » Provides data for uploading to your in-house accounting system

### *No Nasty Surprises*

With Ellserve, an online snapshot of your overall energy position is always available.

- » Checks for anomalies in your energy use
- » Forecasts your energy consumption and cost, by site
- » Tracks energy efficiency initiatives

### *Valuable Performance Reporting*

Ellserve has the capability to generate reports which reveal vital energy data about your business.

Reports include:

- » Energy Costs and Consumption
- » Financial Forecasting / Budgeting
- » CO<sub>2</sub> Emissions
- » Benchmarking

Your energy data can be downloaded at any time using the flexible report generator.

### *Environmental Sustainability*

Ellserve enables you to track the savings you have made by managing your energy more efficiently.

It also provides an effortless way to calculate and monitor your company's CO<sub>2</sub> emissions.

Simply by subscribing to Ellserve, you will improve your company's environmental sustainability profile.
